

**Briefing for Rick Albright**

Dave Bartus to: Adam Baron, David Einan
Cc: Andrew Boyd

01/31/2012 05:26 PM

Adam and Dave: As at least Dave knows, Ecology seems quite intent on explicitly authorizing placement of wastes that do not satisfy LDR treatment standards in the Hanford mixed waste trenches for "in-trench" treatment. I've identified that this is a very significant permit oversight issue to Ron Skinnarland, so we'll be discussing this with Ecology as part of the next EPA/Ecology program manager call with the Nuclear Waste Program. I've asked Kristy Fry to schedule some time with Rick to brief him on this issue before the conference call. I'd like to invite both of you to participate in the Rick briefing, since each of you has at least a finger or two in the issue and its outcome. So, don't be surprised if you get a calendar invitation or call from Kristy.

Thanks!

Dave
